## Daily Stand-Up Meeting

### Hari

Hi everyone. I'll be conducting the daily stand-up meeting today. We can get started.

Good morning, everyone.

### Radhakrishnan

Good morning, Hari. Good morning, Sindhu.

Yesterday, I was assigned a couple of tickets related to **fund transfers**. I initially prepared the manual test cases and got them signed off by the BA and PO on our team.

Since the latest build is now available in QA, I have started testing those scenarios and monitoring how the system behaves under different conditions.

So far, the system is working as expected, and I haven't identified any defects. If I find any issues, I'll raise them accordingly.

Once the test execution is complete, I'll focus on converting the manual test steps into automation scripts and proceed from there.

That's the update from my side. Thank you.

**Hari**

Thank you, Radhakrishnan.

**Sindhu**

Good morning, everyone. Sindhu here.

Yesterday, I completed **smoke and regression testing** for the Payments module and logged three defects in Jira.

Today, I'll continue with manual testing for the **Reports module** and work on automating the **Transaction History** flow using Selenium.

There are no blockers so far. I'm currently waiting for a new build to proceed with revalidation.

That's all from my side. Thank you.

**Hari**

Okay, thank you, Sindhu.

Thank you, everyone, for your updates.

That concludes today's stand-up meeting. Thanks, everyone.

# S09 in Postman Tool

The screenshot displays the Postman application interface. On the left, a sidebar lists a collection named 'GenAI-Sep' with various API endpoints. The selected endpoint is 'POST S09- TextFromImage-base64-Home Assignment', which points to 'https://api.groq.com/openai/v1/chat/completions'. The main workspace shows the details of a successful POST request. The status bar at the top indicates a '200 OK' response with a 793 ms latency and 1.38 KB of data. The response body is displayed in JSON format, showing a chat completion object with a single message from the assistant.
